### M1 PRECISION CLASS WEIGHTS IN STAINLESS STEEL

STAINLESS STEEL weights suitable for use in legal metrology and industrial applications. The M1 precision class allows for the use of these weights for the check and calibration of scales and instruments in class III up to 10000e.

Our solutions for quality assurance and certainty of your measurements.

## MAIN FEATURES

- In compliance with the OIML - r111 recommendation;
- M1 precision class;
- in austenitic polished stainless steel;
- ACCREDIA (EA) calibration certificate upon request;
- available with single or multiple case made of plastic or wood (the case is compulsory for certified weights).

## LASER MARKING SERVICE UPON REQUEST:

- The laser marking service is useful to identify each sample weight or mass individually. More specifically:
    - Marking allows for easier identification and traceability of each weight or mass;
    - It is perfectly smooth, does not remove material from the weight and does not affect the surface, thus avoiding dust deposit;
    - It is customisable, according to the requirements of the companies.
- In addition:
- It remains unchanged over time;
  - It can be performed on previously purchased masses and weights, of all accuracy classes, from 1 g to 20 kg;
  - It is perfect for pharmaceutical industries and laboratories.
